Eligibility criteria for RAPTOR recruitment: Pre-recruitment check

Please check that potential RAPTOR participants are currently experiencing covid-like symptoms BEFORE recruitment. Eligible symptoms are listed below (Protocol v.5, p16-17).

RAPTOR participants MUST be symptomatic at the time of testing

Participants who have had symptoms for no longer than 5 days are eligible to be tested using the BD veritor point of care test.

Main symptom criteria (following government guidelines):

- a **new continuous cough** (coughing a lot for more than an hour, three or more coughing episodes in 24 hours, or if the person usually has a cough it may be worse than usual)
- and/or a **high temperature** (feeling hot to touch on the chest or back without needing to record a temperature)
- and/or a **loss of, or change to, your sense of smell or taste**

Symptoms may also include those thought to be associated with COVID-19, including but not limited to:

- fatigue
- sputum production
- change in sense of taste
- shortness of breath/ dyspnoea
- myalgia
- chills
- dizziness
- headache
- sore throat
- hoarseness
- nausea
- vomiting
- diarrhoea
- nasal congestion

Patients must also:

- be willing and able to give informed consent, or consent on behalf of their child
- not show symptoms severe enough for hospitalisation
- not have previously taken part in the study
